DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-4,6-13,15-20, and 34 are rejected under 35 U.S.C. 102(e) as being anticipated by Chun-Yueh. Chun-Yueh shows an articulating bating and support device comprising two articulating connectors pairs (41) joined by one or more lateral braces that can be sized to set to relative position of an anterior articulating connector having a superior (see fig. 2) and inferior (40) posterior connecting member both of which are independently rotatably, and positionable about a coplanar arc of movement. A positioning stand comprises an anterior and posterior chassis support frame (4) Chun-Yueh further shows a transverse brace (via the anterior chassis support frame (4) as shown in fig. 2) and a head and thorax support frame (3) along a with a lower extremity support (20) .

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person

Art Unit: 3636

having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 24-33 are rejected under 35 U.S.C. 103(a) as being unpatentable over Chun-Yueh. Chun-Yueh shows all of the teachings of the claimed invention. Consequently, the method steps as recited would have been incorporated within the use of the invention as taught by Chun-Yueh.

Allowable Subject Matter

5. Claims 5 and 14 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
6. Claims 21-23 are allowed over the prior made of record.

Response to Arguments

7. Applicant's arguments with respect to claims 1,12-13 and 34 have been considered but are moot in view of the new ground(s) of rejection.
